¹ Based on the quarterly average balance of securities. Calculated in the case of government securities at face value, in the case of equities traded on domestic and foreign exchanges, and other securities introduced to exchange trading, at the last known stock exchange closing price at the end of the quarter, and in the case of investment funds, at the last published net asset value available at the end of the quarter. In the case of any other securities (not traded on regulated markets), or where the market price is unknown, or cannot be determined, the face value of the given securities shall constitute the basis for the fee calculation. If the price of an investment is denominated in a foreign currency, or in the case of a foreign currency account balance, the fees will be determined on the basis of the quarter-end official foreign exchange rate of the National Bank of Hungary.

² Customers holding securities issued by Gardénia, Worldcom INC or Biomimix INC can authorize the bank to block their account by signing an agreement. In this case no orders can be given, no securities related services will be provided and no account management fee will be charged.

³ Indexation of charges and fees: The Bank links the calculation of the charges and fees indicated in the present List of Conditions to the average consumer price-index yearly announced by the Hungarian Central Statistical Office regarding the preceding calendar year. The amount or rate of such charges and fees shall be indexed each year from the 1st day of April automatically to the average consumer price-index applicable for the preceding calendar year. The indexed charges and fees shall be published each year in the present List of Conditions on or before the 1st day of April. Charges and fees shall be rounded off to the nearest whole HUF, or if determined in EUR to the nearest two decimal points, according to the general rules of rounding off. The Bank reserves the right not to apply indexation of charges and fees on one or more occasions regarding specific group of Clients or certain types of services.

Please note that these fees may exceed the yield/value of the securities recorded on the account.

The Bank hereby restricts the possibility of opening segregated KELER sub-account in respect of Customers having specified investment services/products (also the parallel operation of already opened KELER sub-accounts), since the costs of the joint product usage may exceed the benefits of the services. The currently restricted investment service is Raiffeisen Regular Investment services.

In case of cash withdrawal from the securities account the amount of the transaction reduced with the fee of withdrawal will be paid after rounding in accordance with instructions regulated in the 2. § of the act 2008/III.

Matching principles:

In the case of sell orders concerning financial instruments, the Bank shall use the FIFO method for the settlement of the transaction, unless the customer opts for the manual matching method. Manual matching may be used in respect of the following deal types: stock exchange sell orders for Hungarian and foreign equities, bond sell orders, redemption orders for investment certificates, blockage of securities upon the customer's order and the release of blockages, in-house securities transfers between the customer's own accounts.

⁴ Customer starting from the date of 1 January 2016 will be able to entitle the Bank to open a segregated sub-account at KELER for his/her/its domestic issued securities.

⁵ The customer has the right to initiate unilateral blocking/release on its segregated KELER sub-account. In case of beneficiary blocking the customer shall indicate the beneficiary client - having a securities sub-account at KELER - who is entitled to release the blocked securities.

⁶ In case of joint blocking, and release before expiry, the customer and the Bank jointly submit a request for blocking.
